Newsletter

November 2022

Welcome to our November issue of Bureau Veritas' Global Technology Products Newsletter providing our latest updates on electrical, automotive/new mobility and electronics/wireless market segments.

Bureau Veritas accredited as ISASecure® Certification Body

Bureau Veritas CPS has announced its accreditation as an ISASecure Certification Body (CB). This accreditation is granted to CBs that have demonstrated full adherence to ISO 17065 and ISO 17025 Standard. Bureau Veritas can help manufacturers to shorten the testing time of cybersecurity, and provide confidence to create product differentiation for suppliers conforming to the ISASecure specification.

Bureau Veritas Cybersecurity Insight Series +
December Topic: Industrial IoT +

Industrial Cybersecurity relates to connected devices within industrial plants or fields. These can include small devices for personal use, or larger systems controlling industrial processes. The nature of Industrial systems are that update cycles are often much longer than other consumer devices meaning that vulnerabilities can be exploited and often have a greater negative impact.

This webinar will focus on the importance of Industrial Cybersecurity to businesses, and how it touches multiple fields – including regular consumer IoT devices.
